

HEADACHE AFTER HEADACHE

Now She's Free From Them

A tall, sto, dignified man who prays for his country, the trouble of an empire on his shoulders. Britain's new Foreign Secretary.

Vicent Halifax, when Stanley Baldwin was Prime Minister, was the man who took the job of victory of India, and he was the man who took the job of the first thing he did on reaching India was to go to the temple and pray to the gods to spend three hours in meditation as an Anglican church.

Now, as successor to Anthony Eden, the 50-year-old Foreign Secretary from politics in Europe has more reputation than those he is supposed to be in India. And his critics in Parliament have shown no disposition to lighten his task.

Official called the "Christian gentleman" who has been in the office for a prominent high church family, Halifax was born in 1885, 20 years ago when his father, a life-long leader in the movement for the abolition of slavery, died at the age of 85.

Halifax was educated at Eton, Christ Church and All Saints College, Oxford, where he made a reputation as a brilliant student. He was elected in 1913 with his appointment as a member of the House of Commons, and his appointment as the chairmanship of the University of Oxford.

Britain's Foreign Secretary

Anthony Eden, His Deputy Secretary

Now, as successor to Anthony Eden, the 50-year-old Foreign Secretary from politics in Europe has more reputation than those he is supposed to be in India. And his critics in Parliament have shown no disposition to lighten his task.

Official called the "Christian gentleman" who has been in the office for a prominent high church family, Halifax was born in 1885, 20 years ago when his father, a life-long leader in the movement for the abolition of slavery, died at the age of 85.

Halifax was educated at Eton, Christ Church and All Saints College, Oxford, where he made a reputation as a brilliant student. He was elected in 1913 with his appointment as a member of the House of Commons, and his appointment as the chairmanship of the University of Oxford.

THIS BACKACHE IS A GOOD ONE

KIDNEY WILL CAUSE IT

It is a common belief that a single one of the kidneys is sufficient to take care of the body's waste. But this is not true. The kidneys are the body's waste disposal system. If one kidney fails, the other must take over the work. This can lead to serious health problems.

GEOPILLS FOR THE KIDNEYS

May Not Be Famous

But Many Of Canada's Eldest Residents Hold Responsible Position

Mr. Michael's last could not be called very distinguished, nor do we expect to see a great many of his kind in the future. He was a man of great ability and a good deal of energy. He was a man of great ability and a good deal of energy.

Coming Of Television

May Become A Practical Industry

Television might become a practical industry in Canada. It is a new medium that has the potential to revolutionize the way we communicate. It is a new medium that has the potential to revolutionize the way we communicate.

high in comparison with prices for farm products, and that they should be reduced. It is true that the wheat crop is not likely to be so large, and a fairer estimate for the farmer to obtain equality of treatment with the other farmers, rather than to desire that he should be brought down to a similar economic level. Hence, the claims of the wheat producer for the protection of a Wheat Board.

Taking a long view, in the matter of wheat, it will come to nothing but the wheat producer, and why not? The Canadian National Railways are loaned annually from public funds, ranging from six million dollars in 1932 to an estimated fifty millions for the latest fiscal year.

A few facts may help illustrate the cost of a bushel of the wheat producer. The current Canadian Year Book, after giving the 1932-33 wheat crop at 281,835,000 bushels, of which 182,644,103 was presumably for export, states that \$9,290,847 was required for freight, seed, and domestic millage purposes. The Year Book sets the average price obtained for this crop at 41 cents per bushel.

A bushel of just ten cents per bushel on the amount exported would amount to a total of \$18,000,000 to the wheat producer. But there's a suggestion: Why should not wheat used for domestic millage purposes be sold at a lower price than wheat for export? A bushel of just ten cents per bushel, so much, then it does not cost.

Let us be realistic. A bushel of wheat in the open market during the 1932-33 crop year, the \$4,464,847 loaned to the Canadian National Railways for the purpose of the wheat crop, would possibly have yielded a sum of \$13,000,000 to export against the cost of \$18,000,000.

It may be objected that this cost is too high, but it is not. The cost of wheat in the open market during the 1932-33 crop year, the \$4,464,847 loaned to the Canadian National Railways for the purpose of the wheat crop, would possibly have yielded a sum of \$13,000,000 to export against the cost of \$18,000,000.

Hech-Dickinson, of Illinois Motors, was a visitor in Calgary, Mar. 27, at a meeting of the Calgary Motor Club.

Mr. H. F. Crowder returned on Thursday last from a week's visit in Edmonton.

Rev. John Storch returned from Edmonton on Friday piloting a very big machine.

The annual Easter Eve, sponsored by the Catholic Church, will take place on Sat. April 16. See page 1.

Mr. and Mrs. J. K. King left on Thursday last for Calgary and intended to visit the stock show in the city.

After nearly four weeks of Spring the weather, March entirely kept the temperature and came to like a week and went out like a lion this week.

One of the worst storms of the season struck the district last Monday night, when a high wind, accompanied by light snow, that increased in velocity to a blizzard and a 50-mile an hour gale on Tuesday.

Temperatures fell to the zero mark. Train service was disrupted, and bus service suspended. Business was more or less at a standstill.

The storm kept many children from school, those from outlying parts especially failed to show up. The storm kept many children from school, those from outlying parts especially failed to show up.

STANDARD

Above and beyond the standardized processing of ALBERTA BEER by skilled Brewmasters, is the standard equipment in use at all Alberta Brewing Institutions. True, they use the old formulas and the choicest of ingredients, but the methods of control are infinitely finer. Modern equipment, improved plant construction, and handling facilities contribute greatly to the high STANDARD maintained in the manufacturing of ALBERTA BEERS.

the BREWING INDUSTRY OF ALBERTA

"BEERS THAT ARE BEST"
